

BENCHES

We produce stationary and movable benches, as well as benches for garden centres with swivel castors. Their solid structure is made of aluminium profiles (14 or 12.5 cm high boards) and stands of galvanized iron and aluminium, equipped with a side-shifting system, both manufactured by us. In addition, they can be disassembled to be stored in a space-saving package.

- Irrigation water collection into a Danish plastic tray with ebb and flow system and single or double drain valve.
- Feet of galvanized iron, also available in smaller sizes for a more aesthetically pleasing effect for garden centres.
- Possibility to mount Ø 125 swivel castors with or without brake for display purposes.
- On request, our benches can be equipped with a display top bed.
